 marble, Bianco Carrara
 polished, Emperador
 Dark honed and
 polished, Carrara and
 Emperador Dark marble

Elegant Simplicity

WANTING THE ULTIMATE spa indulgence without the need for travel or reservations, these homeowners asked Stacey L. Hoffman of Great Falls Construction/Riverbend Custom Cabinetry & Millwork to redesign their master bath suite into an open retreat washed in elegant simplicity.

At the center of the design, the showpiece shower features a custom-designed freestanding radius shower wall composed of rain glass panels channel set on a knee wall that is faced with a marble tile mosaic. Inside, a seat ledge provides comfort and convenience, and the walls are covered in marble tiles with mosaic patterns blending Emperador Dark and Bianco Carrara waterfalls. These tiles reach all the way to the ceiling and frame three transom windows, which filter in natural light. On opposite sides of the room, his-and-hers custom-height vanities feature Holiday Kitchens' Milan architectural doors with molded center flat panels. Their Coffee Bean finish matches that on the coordinating mirror frames. Other amenities include music from in-ceiling speakers, a wall-mounted flat-screen TV, and a Nuheat programmable custom floor heating system.

Artful in black and white, the space's lack of colors clearly doesn't mean a lack of luxury. The high-end materials, exceptional quality, and creative design elements make this bath suite simply elegant! *Learn more about this designer at www.greatfallsconstruction.com.* «
